Jim

This is to follow-up our conversation earlier today regarding fish tissue collection in the lower Willamette River this fall. In order to minimize costs for this effort, and provide some consistency with previous RI/FS sampling efforts for the RI/FS, EPA is requesting electronic (word and excell) versions of the Round 3B Fish and Collocated Surface Sediment Field Sampling Plan (Integral 2001b), and the Round 2 QAPP Addendum 9 (integral 2007a).

Please let me know if you have any questions regarding this request.

thanks
Chip Humphrey
